

IS Wi-Fi MIC RIGHT FOR YOU?

If any of the following describes your situation then Wi-Fi Mic may be the right solution for you:

- ▶ No functional hearing in one ear
- ▶ Normal hearing or a hearing loss in the better ear
- ▶ Cannot use a traditional hearing aid on the bad ear
- ▶ Lifestyle places high demand on hearing from the bad ear
- ▶ Seeking greater convenience and listening comfort

Even if you have been told in the past that you cannot be helped with hearing aids because you have a *dead ear*, Wi-Fi Mic may help you hear sounds you've been missing. Your hearing healthcare professional can recommend the system to best meet your listening needs.

PRACTICAL SOLUTIONS TO EVERYDAY PROBLEMS

For 40 years, Unitron Hearing has been committed to making life better for people with hearing loss. To us, this means a commitment to not only develop high-quality hearing solutions, but to incorporate special features that really solve the everyday problems and concerns you have with hearing loss and hearing aids. To you, that means a company that's listening and responding to what matters in your life.

TWO SIDES ARE BETTER THAN ONE

HEAR BOTH SIDES OF THE CONVERSATION

Business meetings around a table, listening in restaurants, or driving a car pose listening challenges when you have one *bad ear*.

WiFi Mic is a new digital wireless CROS/BICROS system that uses advanced wireless technology to transmit sounds originating on the side of your bad ear to your *better ear* on the opposite side.

Just as wireless networks allow you to use a cell phone or personal computer without the confinement of cables, WiFi Mic's wireless technology keeps you connected to the voices you want to hear.

No more worries about where to sit to hear conversations. With WiFi Mic, you'll be able to hear both sides of the conversation.

WiFi mic

WiFi Mic is a discreet system that incorporates wireless capabilities with superior digital signal processing. With WiFi Mic you will enjoy:

HEARING CONVERSATIONS FROM YOUR BAD SIDE

Hear what people have to say, even when they are seated on the side of your bad ear. Enjoy conversations in a restaurant, in a car, or when seated around a table without worrying about where to sit so you can hear what's going on.

HEIGHTENED AWARENESS OF SOUNDS

Feel more connected to the voices and sounds around you, even when they originate on your bad ear side.

MORE RELAXED LISTENING

Take pleasure in carefree, easy listening. You'll hear sounds, including soft speech, without having to strain or turn your head.

CUSTOMIZATION FOR YOU

Enjoy the flexibility and many features that are available with advanced digital hearing instruments.
