History of the Dizzy Patient

Timothy C. Hain, MD
Neurology, Otolaryngology, Physical Therapy
Northwestern University Medical School
Chicago, IL

The Questionnaire – 5 minute complete history
- I give the patient “The questionnaire” before seeing (see below to download).
- Read questionnaire.
- Ask the patient to tell you “what’s going on”.
- Proceed on to exam.

History
- Definition
- Timing
- Triggers
- Otologic history
- Social history
- Review of systems
- Medication history
- Family history
- Previous studies

Define Terms
- Dizzy: having a whirling sensation in the head with a tendency to fall
- Vertigo: a disordered state in which the individual or his surroundings seem to whirl dizzily
- (Websters 9th New Collegiate Dictionary)

Define your Dizziness
- Movement? (vertigo)
  - Spinning, rocking, translation
- Blurred vision?
- Confusion?
- Weakness?
- Unsteadiness

If your dizziness comes in spells, how long do the spells usually last?
- Seconds (Quick Spins)
- Less than a Minute
- Minutes to Hours
- Hours to Days
- Days to Weeks
- Months to Years (chronic)
Quick Spins
1-5 seconds

- BPPV
- Vestibular paroxysmia (vascular cross compression syndrome)
- Superior Canal dehiscence
- Seizure

Seconds to a minute

- BPPV
- Cardiac or cardiovascular
- Panic disorder
- “quick spin” – vestibular nerve irritation

Minutes to hours

- Meniere’s Disease
- Migraine
- Panic Disorder
- TIA

Hours to Days

- Menieres
- Migraine
- Stroke and other structural CNS lesions
- Vestibular neuritis/labyrinthitis

Days to Weeks

- Migraine
- Vestibular neuritis/labyrinthitis
- Stroke and other structural CNS lesions
- Drug reactions

Months to Years (Chronic)

- Stroke and other structural CNS lesions
- Fluctuating vestibular disorder (e.g. SCD or fistula)
- Multisensory disequilibrium
- Ototoxicity
- Psychiatric
Triggers

- Position of head ? (usually BPPV)
- Head movement in general ?
- Visual stimuli (Visual dependence)
- Pressure changes (fistula ?)
- Eating (migraine or Menieres)
- Seasons (allergy, migraine)
- Menses (migraine)

Otologic History

- Tinnitus
- Hyperacusis/Phonophobia (migraine)
- Fullness (monaural or binaural)
- Hearing loss (timing, fluctuation, monaural/binaural)
- Ear pain (migraine or TMJ)

Social History

- Drinking/Smoking
- Married with children ?
- Frequent flyer ?
- Active or sedentary ?
- Working ?
- Driving ?
- Litigation ?
- Menopausal ?

Review of Systems

- Put dizziness into context of whole person
  - Cardiac problems ?
  - Vascular risk factors ?
  - Endocrine (thyroid/DM) problems ?
  - Autoimmune ?
  - Psychiatric ?
  - Surgery ?

Medications

- Centrally acting drugs ?
- New drugs
- Blood pressure medications (e.g. Hytrin)
- Diabetic ?
- Thyroid ?
- Exposure to toxins ? (Ototoxins, Chemo, Amiodarone)

Previous encounters with medical system

- Ear testing (ENG, Audiogram)
- Brain testing (MRI, MRA, CT, EEG)
- Blood testing (CBC, Chem profile)
- Neck (if relevant)
